**DETAILED ACTION**

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 17-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "lateral sides" in line 6. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 17-18 and 25-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE '035.

DE '035 discloses a convertible vehicle 1 comprising: a vehicle body 8, 16 having a pair of lateral sides 16, a folding top 2, a tensioning bow 19 (Figs 5-6) coupled to a rear side of the folding top and pivotably supported on both said lateral sides of the body (as seen in the drawing figures), and a rear trunk lid 9, 12, 14 pivotably supported on both said lateral sides of the body (Fig 4), wherein a front side of the lid is disposed in the vicinity of the tensioning bow (Fig 4) when the lid is in a closed position and a loading opening of a luggage compartment 10 is disposed underneath the lid and underneath the bow at least when the top is closed, and wherein

the bow is movable into an upwardly pivoted position (Fig 4) during opening of the lid or when the lid is opened, so that the loading opening 10 is enlarged. DE '035 further comprises a hinge device inherently arranged between the lid and the bow, wherein the hinge device is arranged and constructed to upwardly pivot the bow when the lid is being opened (Fig 4). The lid and bow are approximately co-axially supported relative to the body. The hinge device is arranged and constructed such that, when the lid is being opened (Fig 4), the rear side of the bow is first raised only slightly and then is raised more considerably as the lid is further opened.

***Allowable Subject Matter***

5. Claims 19-24 and 27-40 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments filed 6/25/09 have been fully considered but they are not persuasive. With regard to the 112 second paragraph rejection, the amendments to claim 17 do not overcome the rejection. Perhaps on lines 5 and 6, applicant should instead recite "said lateral sides" for clarity.

With regard to the 102 rejection, applicant argues that DE '035 fails to suggest a tensioning bow. The examiner disagrees and notes reference numeral 19 (best seen in Figs 5-6) apparently described as 'piping' can be interpreted as a tensioning bow.

Further applicant states the tensioning bow is movable into an upwardly pivoted position during the opening of the trunk lid and that DE '035 fails to teach this feature. The examiner disagrees and notes that the tensioning bow 19 is movable into an upwardly pivoted position (best seen in Figure 4) along with the trunk lid. As the trunk lid 9, 12, 14 pivots, so too does the bow 19 and attached convertible top. The bow 19 moves along with the trunk lid into an upwardly pivoted and opened position. For at least these reasons, the rejection of independent claim 17, as broadly recited and interpreted, is hereby maintained.

#### *Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
